

Soul Healing Therapy

This therapy combines a series of techniques and approaches, always with a connection with the spiritual world and the laws of universal intelligence that guide us. Depending on the necessities, we will use one or several of them. Energetic tests are used via dowsing or muscular test in order to evaluate parameters of energetic health and to propose a personalized work plan.

The Liberation and Integration of the Soul Therapy combines:

- Energetic harmonization (Nadiki)
- Liberation of entities and energetic parasites (Nadiki and Spirit Release)
- Karmic deprogramming (SRT)
- Healing and integration of the inner child
- Anchoring and incarnation (to make your soul fit in your physical body)
- Integration of the soul (to recover fragments of the soul in order to make you feel like one again)
- Integration of the polarities (our inner conflicts and these voices that battle inside)
- Connection with the Being and your Inner Light

It includes messages in connection with the spiritual world, visualization and metamorphic technique.

Part of the program offers simple tools you can use daily in order to take better care of your energy, handle your mind and emotions and take control of your life with love and security.

Este trabajo se puede realizar a distancia, por teléfono o skype.
